

Metamark Window Tint

Solar Window Tinting Films

Metamark Window Tint Film is a polyester self adhesive professional grade window tinting film. Available in three finishes and suitable for applications where one-way visibility is required for vehicle and architectural applications.

All three of these films can be used on vehicles but only on the rear and rear side windows, and they may also be used on other toughened glass.

The film relies on light differences to function, ie: visibility will be restricted from the side where there is a greater light level.

Performance you can trust
