

# Metamark Etch Effect Series

Etch Effect Vinyl for Window Manifestation

**Metamark Etch Effect Series** is a premium quality etched glass effect series, available in four distinctive finishes. Each of these window films provide a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass.

The four finishes consist of Crystal Etch (56% light transmission) which offers a distinctive glitter effect, Silver Etch (69% light transmission) which gives higher opacity and greater definition for text, Dusted Etch (87% light transmission) which is more subtle and provides a higher level of visibility and Opal Haze (83% light transmission) which has been formulated to provide a whiter, brighter, acid etched glass effect.
