

MetaScape Etch Effect Series

Etch Effect Vinyl for Window Manifestation

MetaScape Etch Effect Series is a polymeric calendered etch effect series, specially formulated for producing fine window decals and manifestation. The 70 micron film and high quality release liner and adhesive provide fast cutting and easy weeding on all computerised sign making equipment.

The four finishes consist of Crystal Etch (56% light transmission) which offers a distinctive glitter effect, Silver Etch (69% light transmission) which gives higher opacity and greater definition for text, Dusted Etch (87% light transmission) which is more subtle and provides a higher level of visibility and Opal Haze (83% light transmission) which has been formulated to provide a whiter, brighter, acid etched glass effect.

Performance you can trust
