

## Metamark MD5-AB

High Performance Digital Blockout  
Vinyl with MetaScape® System

**Metamark MD5-AB** features the MetaScape® adhesive system, offering faster and easier application by providing air with an exit route from under the graphic, with greater repositioning during application. This is combined with a grey pigmented solvent-based adhesive to provide increased opacity and preventing the substrate colour showing through.

Metamark's high performance 70 micron white face film with its distinctive coating technology produces outstanding print performance on Solvent, Eco-Solvent, UV and Latex printers.

**Performance you can trust**
