

MetaGuard MGIM Series

Performance PVC Overlamine
MetaStream Ready™

MetaGuard MGIM Series is a 70 micron polymeric film, with the added feature of being MetaStream Ready™. The specially formulated solvent- based adhesive is suitable for Solvent, Latex and UV prints, giving a high bond to the low energy surface of UV prints and overcomes silvering.

Overlaminating with **MetaGuard MGIM** provides increased resistance to abrasion and durability of the print and offers UV inhibitors. It is suitable for interior or exterior applications over flat or simple curves.

Performance you can trust
